TO CREATE A STUDENT PROFILE WITHOUT REGISTERING FOR A PROGRAM

The instructions for creating a student profile/account without registering for a program are below.

Another other method is to explore the website, choose the camp(s) you want, and Add to Cart. You will then be required to create a student account and profile during the checkout process. If you are a parent creating a child’s account, please see here for detailed guidelines, as the process is different.

Let’s Get Started:

Go to the Login menu at the very top right hand corner of the learnforlife.unh.edu webpage, and select Student Login.

You are presented with a screen to Log In or Create an Account. This is where you create your profile/account. Enter your email address twice, select the bullet beside ‘Participant is over 18 years of age’ and click Continue.
After clicking Continue, you will be presented with a Contact Information page (screenshot below). Complete this form and click the **Submit** button at the bottom of the page.
After clicking Submit, a customer service request screen (below) will appear letting you know that a user name and password have been emailed (two separate emails) to you at the address you provided. Your profile/account has now been created, and you are in the student profile—a Student Portal menu is now available. **Log out** when you are finished.
If you wish to register for a program at this time, go to the blue menu bar at the top of the window (screenshot above) and click **Programs** to explore the programs available and complete the registration and checkout process.

If you do not wish to register for a program at this time, you may return to UNH Learn for Life at any time to register.

To register, you may:

1. Explore to find the program you want first, and then begin the registration and checkout process. You will be asked to login with your user name and password as a part of this process, or
2. Log into the student’s account using the student’s user name and password, and then explore to find the program you want and then begin the registration process.
